

BILIA EXPANDING FORD OPERATIONS IN STOCKHOLM

During the past few years, the Bilia Group's Ford operations have grown in Sweden, Norway and Denmark. An expansion is now taking place in the Stockholm area. At the beginning of next year, the sale and service of Ford cars and light-duty transport vehicles will begin at Bilia Haga Norra and, at a somewhat later date, Bilia's workshop in Täby will also be available to Ford owners. Towards the summer, the sale of service of Ford cars will be introduced at a newly refurbished Bilia facility in Haninge.

Commenting on these changes, Bilia's CEO, Jan Pettersson, has the following to say.

"In recent years, Ford has developed an environmentally oriented model programme that is also exciting in design terms and we are looking forward to representing the brand throughout Stockholm in the future."
